## **AMENDMENTS TO THE CLAIMS:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

## **LISTING OF CLAIMS**

- 1. (Previously Presented) A method for providing feedback, said method comprising the steps of:
  - a) forwarding a query pertaining to a structured entity having a plurality of parts;
  - b) forwarding a plurality of response templates for answering the query; and
- c) receiving a response from a first client device, wherein said response comprises a completed response template linking a plurality of parts of said structured entity.
- 2. (Previously Presented) The method of claim 1, further comprising the step of:
- d) receiving a response from a second client device, wherein said response comprises a completed response template linking a plurality of parts of said structured entity.
- 3. (Original) The method of claim 2, further comprising the step of:
- e) aggregating said responses from said first and second client devices to produce an aggregated result.
- 4. (Original) The method of claim 3, further comprising the step of:
- f) forwarding said aggregated result to said first client device or said second client device.
- 5. (Original) The method of claim 2, further comprising the step of:
- e) forwarding said response of said first client device to said second client device.

- 6. (Original) The method of claim 1, wherein said structured entity comprises a sequential multi-step process.
- 7. (Original) The method of claim 1, wherein said structured entity comprises a literary work or a portion of a literary work.
- (Original) The method of claim 7, wherein said literary work is a poem.
- 9. (Original) The method of claim 1, wherein said structured entity comprises a computer program.
- 10. (Original) The method of claim 1, wherein said structured entity comprises a musical composition.
- 11. (Original) The method of claim 1, wherein said structured entity comprises a biological organism.
- 12. (Original) The method of claim 1, wherein said structured entity comprises a computer data structure.
- 13. (Original) The method of claim 1, wherein said structured entity comprises an architectural structure.
- 14. (Original) The method of claim 1, wherein said structured entity comprises a chemical process.
- 15. (Original) The method of claim 1, wherein said response contains an input entered by using said first client device.

- 16. (Original) The method of claim 15, wherein said input comprises filling in said at least one response template.
- 17. (Original) The method of claim 15, wherein said input comprises linking said at least one response template to at least one part of said structured entity.
- 18. 19. (Cancelled)
- 20. (Original) The method of claim 1, wherein said input comprises at least one tag.
- 21. (Previously Presented) A method for providing feedback, said method comprising the steps of:
  - a) receiving a query pertaining to a structured entity having a plurality of parts;
  - b) receiving a plurality of response templates for answering the query; and
- c) providing a response to an aggregating device from a first client device, wherein said response comprises a completed response template linking a plurality of parts of said structured entity.
- 22. (Previously Presented) The method of claim 21, further comprising the step of:
- d) providing a response to the aggregating device from a second client device, wherein said response comprises a completed response template linking a plurality of parts of said structured entity.
- 23. (Original) The method of claim 22, further comprising the step of:
- e) requesting for an aggregated result of said responses from said first and second client devices.
- (Original) The method of claim 23, further comprising the step of:
   f) receiving said aggregated result.

→ PTO

- 25. (Original) The method of claim 22, further comprising the step of:f) receiving said response of said first client device by said second client device.
- 26. (Original) The method of claim 21, wherein said structured entity comprises a sequential multi-step process.
- 27. (Original) The method of claim 21, wherein said structured entity comprises a literary work or a portion of a literary work.
- 28. (Original) The method of claim 27, wherein said literary work is a poem.
- (Original) The method of claim 21, wherein said structured entity comprises a computer program.
- 30. (Original) The method of claim 21, wherein said structured entity comprises a musical composition.
- 31. (Original) The method of claim 21, wherein said structured entity comprises a biological organism.
- 32. (Original) The method of claim 21, wherein said structured entity comprises a computer data structure.
- 33. (Original) The method of claim 21, wherein said structured entity comprises an architectural structure.
- 34. (Original) The method of claim 21, wherein said structured entity comprises a chemical process.
- 35. (Previously Presented) A computer-readable medium having stored thereon a

plurality of instructions, the plurality of instructions including instructions which, when executed by a processor, cause the processor to perform the steps comprising of:

- a) forwarding a query pertaining to a structured entity having a plurality of parts;
- b) forwarding a plurality of response templates for answering the query; and
- c) receiving a response from a first client device, wherein said response comprises a completed response template linking a plurality of parts of said structured entity.
- 36. (Previously Presented) The computer-readable medium of claim 35, further comprising the step of:
- d) receiving a response from a second client device, wherein said response comprises a completed response template linking a plurality of parts of said structured entity.
- 37. (Original) The computer-readable medium of claim 36, further comprising the step of:
- e) aggregating said responses from said first and second client devices to produce an aggregated result.
- 38. (Original) The computer-readable medium of claim 37, further comprising the step of:
- f) forwarding said aggregated result to said first client device or said second client device.
- 39. (Original) The computer-readable medium of claim 36, further comprising the step of:
- e) forwarding said response of said first client device to said second client device.
- 40. (Original) The computer-readable medium of claim 35, wherein said structured

entity comprises a sequential multi-step process.

- 41. (Original) The computer-readable medium of claim 35, wherein said structured entity comprises a literary work or a portion of a literary work.
- 42. (Original) The computer-readable medium of claim 41, wherein said literary work is a poem.
- 43. (Original) The computer-readable medium of claim 35, wherein said structured entity comprises a computer program.
- 44. (Original) The computer-readable medium of claim 35, wherein said structured entity comprises a musical composition.
- 45. (Original) The computer-readable medium of claim 35, wherein said structured entity comprises a biological organism.
- 46. (Original) The computer-readable medium of claim 35, wherein said structured entity comprises a computer data structure.
- 47. (Original) The computer-readable medium of claim 35, wherein said structured entity comprises an architectural structure.
- 48. (Original) The computer-readable medium of claim 35, wherein said structured entity comprises a chemical process.
- 49. (Original) The computer-readable medium of claim 35, wherein said response contains an input entered by using said first client device.
- 50. (Original) The computer-readable medium of claim 49, wherein said input

10/611.665

comprises filling in said at least one response template.

- 51. (Original) The computer-readable medium of claim 49, wherein said input comprises linking said at least one response template to at least one part of said structured entity.
- 52. 53. (Cancelled)
- 54. (Original) The computer-readable medium of claim 35, wherein said input comprises at least one tag.
- 55. (Previously Presented) A computer-readable medium having stored thereon a plurality of instructions, the plurality of instructions including instructions which, when executed by a processor, cause the processor to perform the steps comprising of:
  - a) receiving a query pertaining to a structured entity having a plurality of parts;
  - b) receiving a plurality of response templates for answering the query; and
- c) providing a response to an aggregating device from a first client device, wherein said response comprises a completed response template linking a plurality of parts of said structured entity.
- 56. (Previously Presented) The computer-readable medium of claim 55, further comprising the step of:
- d) providing a response to the aggregating device from a second client device, wherein said response comprises a completed response template linking a plurality of parts of said structured entity.
- 57. (Original) The computer-readable medium of claim 56, further comprising the step of:
- e) requesting for an aggregated result of said responses from said first and second client devices.

- 58. (Original) The computer-readable medium of claim 57, further comprising the step of:
  - f) receiving said aggregated result.
- 59. (Original) The computer-readable medium of claim 56, further comprising the step of:
  - f) receiving said response of said first client device by said second client device.
- 60. (Original) The computer-readable medium of claim 55, wherein said structured entity comprises a sequential multi-step process.
- 61. (Original) The computer-readable medium of claim 55, wherein said structured entity comprises a literary work or a portion of a literary work.
- 62. (Original) The computer-readable medium of claim 61, wherein said literary work is a poem.
- 63. (Original) The computer-readable medium of claim 55, wherein said structured entity comprises a computer program.
- 64. (Original) The computer-readable medium of claim 55, wherein said structured entity comprises a musical composition.
- 65. (Original) The computer-readable medium of claim 55, wherein said structured entity comprises a biological organism.
- 66. (Original) The computer-readable medium of claim 55, wherein said structured entity comprises a computer data structure.

- (Original) The computer-readable medium of claim 55, wherein said structured 67. entity comprises an architectural structure.
- 68. (Original) The computer-readable medium of claim 55, wherein said structured entity comprises a chemical process.
- (Previously Presented) An apparatus for providing feedback, said apparatus 69. comprising:

means for forwarding a query pertaining to a structured entity having a plurality of parts and for forwarding a plurality of response templates for answering the query; and

means for receiving a response from a first client device, wherein said response comprises a completed response template linking a plurality of parts of said structured entity.

- (Previously Presented) The apparatus of claim 69, wherein said means for 70. receiving further receives a response from a second client device, wherein said response comprises a completed response template linking a plurality of parts of said structured entity.
- 71. (Original) The apparatus of claim 70, further comprising: means for aggregating said responses from said first and second client devices to produce an aggregated result.
- (Original) The apparatus of claim 71, wherein said forwarding means further 72. forwards said aggregated result to said first client device or said second client device.
- (Original) The apparatus of claim 70, wherein said forwarding means further 73. forwards said response of said first client device to said second client device.
- (Previously Presented) An apparatus for providing feedback, said apparatus 74.

10/611,665

## comprising:

means for receiving a query pertaining to a structured entity having a plurality of parts and for receiving a plurality of response templates for answering the query; and

means for providing a response to an aggregating device from a first client device, wherein said response comprises a completed response template linking a plurality of parts of said structured entity.

- 75. (Previously Presented) The apparatus of claim 74, wherein said means for providing further provides a response to the aggregating device from a second client device, wherein said response comprises a completed response template linking a plurality of parts of said structured entity.
- 76. (Original) The apparatus of claim 75, further comprising: means for requesting for an aggregated result of said responses from said first and second client devices.
- 77. (Original) The apparatus of claim 76, wherein said receiving means further receives said aggregated result.
- 78. (Original) The apparatus of claim 75, wherein said receiving means further receives said response of said first client device by said second client device.
- 79. (Previously Presented) A system for providing feedback, said system comprising:
  - a first client device; and
- an aggregating device for forwarding a query pertaining to a structured entity having a plurality of parts and a plurality of response templates for answering the query to said first client device, where said aggregating device receives a response from said first client device, wherein said response comprises a completed response template linking a plurality of parts of said structured entity.
